

BROTHER COMPLETES ACQUISITION OF NEFSIS CORPORATION

BRIDGEWATER, NJ – December 1st, 2011 – The Brother group of companies, a leading manufacturer and distributor of high-quality printing devices for home, office and commercial environments, announced today that it has acquired Nefsis Corporation.

Founded in 1998, and based in San Diego, California, Nefsis Corporation is an innovator in web-based remote collaboration and conferencing software. The company, operating under the Nefsis, ePop and WiredRed brands, has developed a range of solutions for messaging and collaboration that are used by customers around the world. As part of the Brother Group, Nefsis will remain in San Diego and continue development of cloud-based communications solutions.

“We are very excited to bring the creativity and technology of Nefsis to the Brother Group,” said Tadashi Ishiguro, President of Brother International Corporation, USA. “Nefsis remote collaboration solutions have a loyal following, due to their industry-leading features, quality, and performance. The Nefsis technology and team will complement Brother and expand the ways in which Brother supports small and medium-sized businesses.”

About Brother

Brother International Corporation in Bridgewater, NJ is the corporate headquarters for the Brother group of companies in the Americas (from Canada to South America), and has fully integrated sales, manufacturing, marketing, research and development capabilities, located here in the US. In addition to its headquarters in Bridgewater, New Jersey, Brother International Corporation also has offices in California, Illinois, Massachusetts and Tennessee, as well as direct and indirect subsidiaries in locations including Canada, Argentina, Brazil, Chile, Peru, Tennessee, Mexico, Colorado, New Jersey, and now, California. About Nefsis

Headquartered in San Diego, California, Nefsis is a technology specialist in video conferencing software and cloud computing online services. The Company's global cloud provides multipoint HD video and advanced collaboration tools to business, government and educational customers in more than 45 countries worldwide. As compared to previous generations of infrastructure hardware solutions such as video routers, MCUs and gateways, the Nefsis cloud-based offering is less expensive, automatically maintained, and easier to expand.
